

GW-4+ Fiber Stripper

Features:

- 4 holes fiber coating stripping, support stripper double 250 μ m bare fibers together, 0.9~3mm patchcord
- 420 stainless steel hardened body, stable and durable
- CNC cutting technology, sharp and easy to stripper fiber
- 3M fiber sand polishing and grinding, high smoothness surface, wear-resistant and corrosion-resistant
- Safety buckle design, protecting the blade edge and preventing accidental injury
- Equipped with a reset spring and PVC anti-slip handle

Specifications:

Items	Specifications
Model	GW-4+
Product usage	Peel off the outer sheath and coating layer of the optical fiber
Holes number	4 holes (Small: 125~250 μ m; Medium: 250~900 μ m; Large: 2mm~3mm)
Applicable fiber	250 μ m bare fiber, 0.9~3mm patchcord/pigtail
Fiber cladding diameter	125 μ m
Fiber coating diameter	250 μ m

Production process	Stamping forming, surface drawing and polishing treatment
Material	420 Stainless steel
Weight	120g
Size(length)	163mm
