

GW-6 Multi functional Fiber Stripper

Features:

- 6 holes design, support stripper double 250μm bare fibers together, 0.9~3mm patchcord, indoor/outdoor drop cable, reinforced steel wire and Kevlar
- 420 stainless steel hardened body, stable and durable
- CNC cutting technology, sharp and easy to stripper fiber
- Fine grinding and polishing, high smoothness surface, wear-resistant and corrosion-resistant
- Safety buckle design, protecting the blade edge and preventing accidental injury
- Equipped with a reset spring and PVC anti-slip handle

Specifications:

Items	Specifications
Model	GW-6
Product usage	Peel off the outer sheath and coating layer of the optical fiber
Holes number	6 holes(Small: 125~250μm; Medium: 250~900μm; Large: 2mm~3mm) Serrated cutting edge Reinforced steel wire cutting edge 2x3mm drop cable cutting edge

Applicable range	250μm bare fiber, 0.9~3mm patchcord/pigtail, 2x3mm drop cable, Kevlar, Reinforced steel wire
Applicable drop cable fiber	1~2 core cross-section (2x3) mm with metal or non-metal reinforcement
Fiber cladding diameter	125μm
Fiber coating diameter	250μm
Material	420 Stainless steel
Weight	130g
Size(length)	165mm
