

Heating Stripper

Features:

- Suitable for non-destructive heating stripping of 2~12 core ribbon fibers, 250um bare fiber and 0.9mm fiber.
- Built in 6000mAh large capacity lithium battery
- Support heating status indicator light and battery level indicator light
- Metal shell, delicate appearance, stable and durable

Specifications:

Items	Specifications
Applicable fiber	Non destructive thermal stripping of single core, bundle and ribbon optical fibers
Coating layer material	UV curable resin
Fiber cladding diameter	125μm
Number of fiber cores	900um fibers: 1~12 cores Bare fibers(250um): 1~48 cores Ribbon fibers(250um): 2~48 cores
Stripping length of coating layer	Up to 30mm length
Temperature settings	160℃
Battery capacity	6000mAh lithium battery

Charging interface	Type-C
Bidirectional charging	Power bank function
Input/output power	10~15W
Weight	About 248g
Size	116(L)mm×44(W)mm×28(H)mm
